Tiberiu Nazare

I'm a motivated go-getter who thrives in fast-paced environments and tackles challenges head-on. With a knack for staying cool under pressure, I have excelled in a variety of roles across different industries, always getting the job done – and done well. Whether it's managing tight deadlines or juggling multiple tasks, I keep a positive attitude and deliver top quality results, no matter what the day throws my way. Adaptable, hardworking, and always ready to learn something new, I love jumping into new challenges and making an impact wherever I go.

Work Experience

Operations manager, Flattire, Remote

September 2018 - November 2024

While working for Flattire, a mobile bike-fixing service based in Amsterdam, I oversaw three teams of mechanics located in three cities in the Netherlands (Amsterdam, Utrecht and Den Bosch). Since the team size was quite small, I've had multiple responsibilities - planning the day by day schedule and activities, customer support, accounting, social media, keeping our bike parts stock up to date, etc. An extraordinary team who's journey together ended when the company was bought out by a bigger competitor with a different business model.

Bike messenger, Uber Eats, Bolt food, Bucharest

March 2017 - January 2025

As I've always been focused on a healthy lifestyle, I couldn't pass on the opportunity to have some extra income while riding my bike around town. Have been doing this in my spare time ever since the first delivery companies started hiring cyclists.

Bartender, Zona Libera, Bucharest

June 2018 - November 2018

The first bartender of one of the coolest bars in Bucharest. Proud to have been part of this team from the start and to know I've helped grow this business to the point where it's almost always packed with clients. Would recommend to anyone at least a short experience in HoReCa, solely on the life lessons and people skills it teaches!

Player Support Specialist, Telus International, Bucharest

October 2017 - June 2018

As part of the Telus team, I was assigned to a gaming project, offering support on a wide array of problems (technical, accounting, disputes over banned accounts, even mental/emotional etc) to League of Legends players, in English.

Customer Retention Advisor, Cargus, Bucharest

October 2016 - September 2017

As part of the Cargus team, my main responsibilities were offering efficient and sales oriented support to clients who were experiencing issues with the delivery service, while keeping in touch with our delivery agents and warehouse staff from around the country, having to track down the location of lost parcels and figuring out who's responsible for lost/damaged items.

Video editor & Content creator, Lolclass, Remote

May 2014 - September 2016

Working for Lolclass, a start-up in the gaming industry, I've had multiple responsibilities, the main ones being graphic designer and video editor, but also managing the relations with players under contract, and depending on the work volume and deadline, content creator and social media specialist.

Education

Automation and computer science, Gheorghe Asachi Technical University Iasi

October 2011 - July 2015

Matemathics and Computer Science, National College Cuza Voda Husi

September 2007 - July 2011

Volunteering

Volunteer, IQ Support

Participated as a volunteer at numerous festivals (Waha, Outernational days, 3 Smoked Olives, Summerwell, BurgerFest, Deep Purple concert) where I helped with almost anything you can think of (from production, to spreading fliers, coordinating a team of volunteers, implementing a system for garbage collection to facilitate recycling, tending bar, etc) and also took part in an exchange project in Turkey with the goal of improving intercultural exchange, teamwork and leadership skills. I love working with other people so whenever I have some free time on my hands, I like to sign up for various projects/experiences that will facilitate my personal growth.

Hobbies

Hiking, Cycling, Kayaking

Courses

Fullstack Web Developer Course, Udemy (HTML, CSS, Javascript, React, Node.js, Express.js, SQL, PostgreSQL)

Ultimate React Course, Udemy (React+Redux, Next.js, Tailwind CSS)
